ANALYTICAL RESULTS

Analysis Heavy Metals - Prop 65
Instrument ICP-MS
Method MF 24E020
Analysis Date March 30, 2026 to April 02, 2026

Analyte	LOD/LOQ (µg/g)	Findings (µg/g)	Findings (µg/serving)	NSRL*	MADL*	Status
Arsenic	0.001/0.004	ND	ND	10	--	Pass
Cadmium	0.001/0.004	ND	ND	--	4.1	Pass
Mercury	0.001/0.004	ND	ND	--	0	Pass
Lead	0.001/0.004	ND	ND	15	0.5	Pass

**Please note that this determination is based on 1 serving size consumed per day. Proposition 65 does not explicitly outline a calculation for daily exposure and different interpretations are possible.

***Products with results that surpass safe harbor levels, which include No Significant Risk Levels (NSRLs) for cancer-causing chemicals and Maximum Allowable Dose Levels (MADLs) for chemicals causing reproductive toxicity, are required to provide the appropriate warning.

****The proposition 65 list includes safe-harbor levels for inorganic arsenic, but our heavy metals screen tests for total arsenic (inorganic + organic arsenic). As such, an arsenic result below the NSRL/MADL will inherently pass, while an arsenic result above the NSRL/MADL may require additional testing to verify if a warning is required.

*****The above limits apply for orally consumed products. Different limits may be applicable for inhalable and other products.
